

- 70 ton straight push cylinder
- Programmable logical controller
- Bale made light
- Cross tying - Up to 8 ties
- Hardened shear blade
- Dual cylinder hydraulic end door
- Range of loading hoppers available including bespoke systems
- 12 months parts & labour warranty
- Stress engineered body

The A800F is a specialist semi automatic baler, purpose built for the baling of foam and other difficult materials. This machine enables bales to be tied by up to 8 ties, 4 horizontally and 4 vertically over the bale. Producing bales of up to 550kg in weight this baler is perfect for maximising transport pay loads.

Model	A800 FOAM BALER
Motor (kW)	18.5
Power	40 amp three phase
Compaction force	70 tonne
Cycle time	50 seconds
Tape/wire ties	up to 8
Operating pressure	1700 P.S.I
Gross weight	10,500 kg approx
Overall length	7550mm
Overall height	3100mm (dependent on final spec)
Overall width	1652mm

OPTIONAL EXTRAS

Bin lift systems, auto start, bespoke hopper, faster cycle time, telemetry pack, key exchange safety systems, bale ramps, larger main cylinder.
